

# WYOMING GEO-FENCE GUIDELINES

CareBridge has implemented a half mile geo-fence for all Wyoming Department of Health visits across both Personal Care and Home Health services. This radius will apply to any addresses in a member's CareBridge profile. Caregivers will be able to check in or out of visits outside of the half mile radius, however in these instances they must select a reason during the check in or out to be able to complete the visit and ultimately bill. Once the reason why the caregiver was outside of the approved radius has been selected, administrators **will not** be able to edit this choice in the portal.

Providers using Third-party EVV systems must provide reason codes with submitted visit data if caregivers check in or out of visits outside of the half mile radius from the member's address(es).

Code	Reason Description
LOR1015	Temporary/Secondary Service Location
LOR1020	Off-site/Within the Community
LOR1025	Travel/Vacation
LOR1030	Mistaken Click-in/Clock-out
LOR1035	Technical Issue
