

Home and Community Based Services

Good morning:

CareBridge, the contractor for the Wyoming Electronic Visit Verification (EVV) solution for personal care services, will be implementing system updates the evening of September 14, 2023 that will improve the provider experience for respite services. When providers are authorized to render both daily and 15 minute respite units (T1005 and S5151 respectively), and have EVV visits that span across two dates of service, the system will now automatically determine the prior authorization that should be utilized and billed based on the total duration of all visits completed during each date of service.

The Home and Community-Based Services (HCBS) Section has developed the [linked guidance document](#) that walks the reader through possible scenarios, how the EVV system will respond, and what providers may experience. The HCBS Section strongly encourages all respite providers to review the scenarios and become familiar with what may occur when they provide and bill for services.
