TEST CASE 4A – SPLIT CLAIM ACROSS MONTHS	13
TEST CASE 4B – SUBMIT AN OVERNIGHT VISIT WITH A NON-SPLIT CLAIM LEVEL ICN	14
TEST CASE 5 – SUBMIT VISIT THAT ADJUSTS A PREVIOUSLY PAID CLAIM	16
TEST CASE 6 – SUBMIT A VISIT WITH A DIFFERENT CAREGIVER	
TEST CASE 7 – SUBMIT AN OVERNIGHT VISIT WITHOUT A SPLIT ICN	19
APPENDIX A	21

The purpose of this document is to assist Third Party EVV Vendors who would like to supply invoice numbers to CareBridge to be included on 837 files generated by CareBridge. ICNs are ways to uniquely identify claims or claim lines on 837 files and enables vendors and/or providers to automatically post information received on 835s to their AR systems. Claim Level ICNs are included on the CLM01 Patient Control Number in the 837; Claim Line ICNs are included as a REF\*6R Line Item Control Number

For this functionality to be enabled for a Vendor, they must complete configuration and test cases outlined below. The reason for this is to ensure that the vendor is submitting values in these fields in such a way that claims can be generated without issues. Vendors who are unable to follow the required logic will not be permitted to send ICNs from their system. CareBridge will generate ICN values within our system to ensure that there are no delays to claim generation or payment. This document is intended for Technical Teams who will be implementing the required ICN logic to conform to the CareBridge ICN specification.

In Tennessee, Providers have the option of billing on a daily, weekly, or monthly cadence for Home Health claims. Vendors will need to identify the possible billing frequencies that will be utilized by their providers and complete ICN testing for each billing frequency that will be utilized in Production.

- Daily Claiming all visits for the same provider, member, authorization, and DOS will be rolled together into a single claim for that day.
- Weekly Claiming all visits for the same provider, member, authorization, and DOS will be rolled into a single claim line and will be included on a single multi-line claim per week. A week is defined as running from Sunday-Saturday. Claim Line ICNs will be unique for each DOS.
- Monthly Claiming all visits for the same provider, member, authorization, and DOS will be rolled into
  a single claim line and will be included on a single multi-line claim per month. Claim Line ICNs will be
  unique for each DOS.

This testing guide is intended to test **monthly** billing frequency ICNs.

#### Before you get started

In order to initiate the testing process, you will need to complete the following steps:

- Complete the standard testing process (see Testing Process Guide).
  - o ICN Test Cases should be completed with a different member and authorization than was used to complete the standard testing process.
- Review the Vendor ICN Specification and confirm that your system will be able to meet these specs.
- Complete the ICN specific Vendor Intake Form (<u>available here</u>) to communicate any specific ICN related configurations.
- If Vendor specific configurations (such as ICN reuse) are required, these configurations should be enabled prior to initiating the testing process to ensure alignment between testing and production environments.

Page | 3 V3\_Jun25

#### **ICN Configurations**

Configuration	Description	Options	Use Case
Claim Level or Claim + Line Level Invoice Numbers	CareBridge is able to accept ICNs from vendors at either the claim level or Claim Line level. Claim Level ICNs utilize a single ICN for an entire claim Claim line ICNs utilize an ICN for each claim line.	1) Claim Level 2) Claim Level + Line Level	Claim Level ICN – Match appointments sent to CareBridge with Patient Control Number on 835.  Line Level ICN – Match appointments sent to CareBridge with Line Item Control Numbers on 835.
Reuse ICNs	By default, CareBridge expects a unique ICN for each provider/member/authorization/payer/care giver/billing period; however, it is possible for vendors to be configured to use the same ICN for multiple billing periods.	Enable ICN Reuse: Y/N	The same ICN will be used for multiple billing periods as defined by CareBridge. For example, vendor system uses the same ICN values for multiple weeks within a given month.
Default Second ICN field	By default, if a visit crosses midnight, and a second ICN is not included, CareBridge will trigger an error. It is possible to turn on functionality to assume that the second ICN field if omitted, should mirror the first). This should only be used if the same ICN is used for a member regardless of the date or billing period.	Default Second ICN: Y/N	The same ICN will be used for a particular member/authorization for every billing period and vendor system is unable to generate an additional ICN on overnight visits.

#### General Testing Information

- ICN Test Cases should be completed with the specific authorization and member data provider for ICN testing.
- Vendors should complete the Integration Testing Checklist throughout the course of testing.
  - Checklist can be found in Appendix A.
- Once testing has been completed, please email the completed testing checklist (in Appendix A) to CareBridge at <a href="mailto:evvintegration@carebridgehealth.com">evvintegration@carebridgehealth.com</a> for validation.
- Once CareBridge has reviewed testing results/checklist and has determined that the requirements of
  the Technical Specifications have been met CareBridge will enable the vendor and associated agencies
  to submit EVV visit data with ICNs in the production environment. Prior to successful completion of
  this testing guide, vendor submitted ICNs will not be enabled and CareBridge will generate ICNs for any
  claimed visits.

Page | 4 V3\_Jun25

- **Note:** In Tennessee, US/Central and US/Eastern are both valid time zones; however, specific times provided in test cases are given in **US/Central** time. As stated in the technical specification, DateTimes in the inbound data files must be converted to **UTC**.
- For a Test Case to pass, all Sub-Test Cases must be successfully passed.
- If visits are received that do not conform to the logic as described within the ICN specification, prebilling validation alerts will be triggered (e.g. if multiple distinct claim ICNs are received for the same member, authorization, provider, payer, and billing period, a conflicting ICN error will be generated).
- Once ICNs are enabled in production, if there is a significant volume of visits unable to be billed due
  to ICN related prebilling errors, CareBridge may choose to disable Vendor submitted ICNs in order to
  ensure that providers' claims are able to be billed. These fields are optional and claim generation can
  be successfully completed by CareBridge without using vendor submitted ICNs.
- Instructions in orange only apply to vendors using both claim level and Line level ICNs.
   They will need to also follow all instructions for claim level ICNs.

• CareBridge will provide you with test data to use for test cases.

#### Test Case 1 – Submit a Visit with an ICN

#### Purpose

To ensure that vendors can successfully submit ICNs for completed visits submitted to CareBridge for claim generation.

#### **Test Prerequisites**

• Standard Test Cases Complete

#### Test Data Requirements

- ApptStartDateTime must be 9:00 am US/Central on April 3, 2025.
- ApptEndDateTime must be 11:00 am US/Central on April 3, 2025.
- CheckInDateTime must be 9:00 am US/Central on April 3, 2025.
- CheckOutDateTime must be 11:00 am US/Central on April 3, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must be populated.

#### If using Line ICNs:

- Field 103 must be populated with a unique value.
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

#### **Expected Outcome**

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - Claim1 InvoiceNumber should match the ICN submitted by the vendor
  - o If using Line ICNs, Line1 InvoiceNumber should match the ICN submitted by the vendor

Page | 8 V3\_Jun25

## Test Case 2a – Submit Multiple Visits on the Same Day

#### Purpose

Visits that occur on the same day, for the same provider, member, service, and modifiers will be included as a single claim and claim line.

This test demonstrates that vendors are able to submit the same Claim Level ICN or Claim + Claim Line Level ICNs for multiple visits on the same day.

#### **Test Prerequisites**

Test Case 1 must be complete

#### Test Data Requirements

#### Visit 1

- ApptStartDateTime must be 9:00 am US/Central on April 8, 2025.
- ApptEndDateTime must be 11:00 am US/Central on April 8, 2025.
- CheckInDateTime must be 9:00 am US/Central on April 8, 2025.
- CheckOutDateTime must be 11:00 am US/Central on April 8, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must be populated with the same value that was used in Test Case 1

#### If using Line ICNs:

- Field 103 must be populated
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Visit 2

- ApptStartDateTime must be 1:00 pm US/Central on April 8, 2025.
- ApptEndDateTime must be 3:00 pm US/Central on April 8, 2025.
- CheckInDateTime must be 1:00 pm US/Central on April 8, 2025.
- CheckOutDateTime must be 3:00 pm US/Central on April 8, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must match the value of Field 101 in Visit 1

#### If using Line ICNs:

- Field 103 must match the value of Field 103 in Visit 1
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

Page | 9 V3\_Jun25

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptIDs until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for those ApptIDs.

#### Expected Outcome (Vendor)

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptIDs sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - o Claim1 InvoiceNumber should match the ICN submitted by the vendor for both visits
  - If using Line ICNs, Line1\_InvoiceNumber should match the ICN submitted by the vendor for both visits

#### Test Case 2b – Submit Visits on Different Days in the Same Week

#### Purpose

For weekly billing, visits that occur on different days within the same week, for the same provider, member, and authorization will be rolled up into a single claim with a single Claim Level ICN. Each date of service within that week would have a distinct Line Level ICN.

This test demonstrates that vendors are able to submit the same Claim Level ICN for multiple visits in the same week.

#### Test Prerequisites

- Test Case 2a must be complete
  - o The visit for Test Case 2b will be included on the same claim as the visit from Test Case 2a

#### Test Data Requirements

- ApptStartDateTime must be 9:00 am US/Central on April 09, 2025.
- ApptEndDateTime must be 11:00 am US/Central on April 09, 2025.
- CheckInDateTime must be 9:00 am US/Central on April 09, 2025.
- CheckOutDateTime must be 11:00 am US/Central on April 09, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must be populated with the same value that was used in Test Case 2a

#### If using Line ICNs:

- Field 103 must be populated with a unique value
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

Page | 10 V3\_Jun25

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

#### **Expected Visit Outcome**

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - o Claim1\_InvoiceNumber should match the ICN submitted by the vendor for both visits in 2a

Page | 11 V3\_Jun25

#### Test Case 3 – Submit an Overnight Visit

#### Purpose

If a visit crosses midnight within a month, the same ICN must be provided for both components of the visit.

#### **Test Prerequisites**

• Test Case 2 must be complete

#### Test Data Requirements

- ApptStartDateTime must be 9:00 pm US/Central on April 19, 2025.
- ApptEndDateTime must be 11:00 am US/Central on April 20, 2025.
- CheckInDateTime must be 9:00 pm US/Central on April 19, 2025.
- CheckOutDateTime must be 11:00 am US/Central on April 20, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must be populated with the same value that was used in Test Case 1
- Field 102 must be populated with the same value used in field 101.

#### If using Line ICNs:

- Field 103 must be populated
- Field 104 must be populated with a different value than field 103.
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

#### Expected Outcome (Vendor)

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - Claim1 InvoiceNumber should match the ICN used in field 101
  - Claim2 InvoiceNumber should match the ICN used in field 102
  - o If using Line ICNs, Line1 InvoiceNumber should match the ICN used in field 103
  - If using Line ICNs, Line2 InvoiceNumber should match the ICN used in field 104

Page | 12 V3\_Jun25

## Test Case 4 – Combination of Split Visits with Other Visits Test Case 4a – Split Claim Across Months

#### Purpose

If a visit crosses midnight across months, distinct claim level ICNs must be provided for the component of the visit that occurs within each billing month.

Visits that have claims split across months will still be rolled up with other visits on either side of the month partition.

In the example below, any components of visits for the same provider, member, and authorization that occur between 12:00 am April 1, 2025 – 11:59 pm April 30, 2025 will be rolled into a single claim and any components of visits that occur between 12:00 am May 1, 2025 and 11:59 pm May 31, 2025 will be rolled into a different claim.

#### **Test Prerequisites**

• Test Case 3 must be complete

#### Test Data Requirements

#### Visit 1

- ApptStartDateTime must be 9:00 pm US/Central on April 30, 2025.
- ApptEndDateTime must be 11:00 am US/Central on May 1, 2025.
- CheckInDateTime must be 9:00 pm US/Central on April 30, 2025.
- CheckOutDateTime must be 11:00 am US/Central on May 1, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must be populated with the same value that was used in Test Case 1
- Field 102 must be populated with a different value than field 101.

#### If using Line ICNs:

- Field 103 must be populated
- Field 104 must be populated with a different value than field 103.
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

Page | 13 V3\_Jun25

#### Expected Outcome (Vendor)

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - o BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - Claim1 InvoiceNumber should match the ICN used in field 101 for Visit 1
  - Claim1 InvoiceNumber should match the ICN used in field 101 for Visit 2
  - $\circ\quad$  Claim2\_InvoiceNumber should match the ICN used in field 102 for Visit 2

#### If using Line ICNs:

- Line1 InvoiceNumber should match the ICN used in field 103 for Visit 1
- o Line1 InvoiceNumber should match the ICN used in field 103 for Visit 2
- o Line2 InvoiceNumber should match the ICN used in field 104 for Visit 2

Test Case 4b – Submit an Overnight Visit with a Non-Split Claim Level ICN

#### Purpose

If a visit crosses midnight within a single billing period, only 1 claim level ICN should be provided. This visit will be claimed together with other visits in the same billing period.

#### Test Prerequisites

Test Case 4a must be complete

#### Test Data Requirements

- ApptStartDateTime must be 9:00 pm US/Central on May 2, 2025.
- ApptEndDateTime must be 11:00 am US/Central on May 3, 2025.
- CheckInDateTime must be 9:00 pm US/Central on May 2, 2025.
- CheckOutDateTime must be 11:00 am US/Central on May 3, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must be populated with a value that matches Field 102 in Test Case 4a.
- Field 102 must be null

#### If using Line ICNs:

- Field 103 must be populated with a unique value
- Field 104 must be populated with a unique value
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

Page | 14 V3\_Jun25

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

#### Expected Outcome (Vendor)

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.

Claim1\_InvoiceNumber should match the ICN used in field 101. It should also match the Claim2 InvoiceNumber associated with Test Case 4a

Page | 15 V3\_Jun25

#### Test Case 5 – Submit Visit that Adjusts a Previously Paid Claim

#### Purpose

If a visit occurs during the same billing period, but is not included as part of the initial claim for the billing period when the claim is generated (e.g. if that visit had unresolved pre-billing rejections or that visit was not transmitted to CareBridge until after the claim was submitted), then the original claim must be corrected. After the original claim reaches a terminal status, that claim can be modified by submitting visits with the same ICN as was used for the original claim. As an alternative, all visits that would share an ICN can all be resubmitted with a new ICN for the billing period.

#### **Test Prerequisites**

- Test Case 1 should be complete
- The claim for Test Case 1 should be in a terminal status.

#### Test Data Requirements

- ApptID should be distinct from Test Case 1
- ApptStartDateTime must be 9:00 am US/Central on April 5, 2025.
- ApptEndDateTime must be 11:00 am US/Central on April 5, 2025.
- CheckInDateTime must be 9:00 am US/Central on April 5, 2025.
- CheckOutDateTime must be 11:00 am US/Central on April 5, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Field 101 must match the value used in Field 101 for Test Case 1

#### If using Line ICNs:

• Field 103 must differ from the value used in Field 103 for Test Case 1

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

#### **Expected Outcome**

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.

Page | 16 V3\_Jun25

- BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
- Claim1\_InvoiceNumber should match the value submitted by the vendor in field 101. It should also match the Claim1\_InvoiceNumber that was previously sent in the Appointment Status Report for Test Case 1.
- If using Line ICNs, Line1\_InvoiceNumber should match the value submitted by the vendor in field 101. It should also match the Line1\_InvoiceNumber that was previously sent in the Appointment Status Report for Test Case 1.

Page | 17 V3\_Jun25

#### Test Case 6 – Submit a Visit with a Different Caregiver

#### Purpose

To ensure that vendors understand that distinct caregivers for same member, procedure code /modifiers, and billing period will be included on the same claim. The value included in field 101 should align with the value used in other visits in the same billing period for the same member, authorization, and provider.

#### **Test Prerequisites**

• Test Case 3 Complete

#### Test Data Requirements

- ApptStartDateTime must be 9:00 am local time on April 22, 2025.
- ApptEndDateTime must be 11:00 am local time on April 22, 2025.
- CheckInDateTime must be 9:00 am local time on April 22, 2025.
- CheckOutDateTime must be 11:00 am local time on April 22, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- CaregiverID must be a different value from CaregiverID used in Test Case 3
- ClaimAction must be "N"
- Field 101 must be populated with the same value that was used in field 102 for Test Case 3.

#### If using Line ICNs:

- Field 103 must be populated with a unique value
- Test Cases 1, 2a, 2b, 3, 4a, 4b, and 6 should be completed at the same time (in the same file).

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 1. Send a visit with ClaimAction "N" to generate a claim.
- 2. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 3. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 4. The following day, vendor should review the Appointment Status Report for that ApptID.

#### **Expected Outcome**

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - Claim1\_InvoiceNumber should match the ICN submitted by the vendor

Page | 18 V3\_Jun25

#### Test Case 7 – Submit an Overnight Visit without a Split ICN

#### Purpose

If an overnight visit crosses billing periods for visits with procedure codes that have unit types that are not duration based (e.g., Per Visit), a single claim level ICN must be provided for the visit. Additional details regarding procedure code unit types are available in the Integration Guide.

#### **Test Prerequisites**

• Test Case 6 must be complete

#### Test Data Requirements

- ApptStartDateTime must be 9:00 pm local time on April 30, 2025.
- ApptEndDateTime must be 11:00 am local time on May 1, 2025.
- CheckInDateTime must be 9:00 pm local time on April 30, 2025.
- CheckOutDateTime must be 11:00 am local time on May 1, 2025.
- CheckinMethod should be E, I, or M.
- CheckOutMethod must match CheckInMethod.
- ClaimAction must be "N"
- Member and Authorization must be different from previous test cases.
- ServiceCode must be G0158.
- Field 101 must be populated with a unique value.
- Field 102 must be null.

#### If using Line ICNs:

- Field 103 must be populated with a unique value.
- Field 104 must be null.

All required fields indicated in the Completed Visit column of the Appointments / Visits Data File Format table must be included.

#### Action Taken

- 5. Send a visit with ClaimAction "N" to generate a claim.
- 6. Retrieve response file from output folder and confirm that there are no prebilling validation errors that need to be corrected.
- 7. (If needed) Correct and re-send ApptID until all prebilling validation errors are resolved.
- 8. The following day, vendor should review the Appointment Status Report for that ApptID.

#### Expected Outcome (Vendor)

- Vendor receives a response file with no prebilling validation errors corresponding to the ApptID sent.
- The following day, Vendor should see that visit in the Appointment Status Report with the following information:
  - HasErrors should be false.
  - BilledUnits should equal the visit duration in minutes divided by the units for the ServiceCode/Modifiers listed in the Integration Specification.
  - BilledAmount should equal the Rate (as provided in the visit file by the vendor) times the billed units.
  - o Claim1\_InvoiceNumber should match the ICN used in field 101
  - Claim2 InvoiceNumber should match the ICN used in field 102
  - If using Line ICNs, Line1 InvoiceNumber should match the ICN used in field 103

Page | 19 V3\_Jun25

 $\circ\quad$  If using Line ICNs, Line2\_InvoiceNumber should match the ICN used in field 104

Page | 20 V3\_Jun25

### Appendix A

#### ONCE TESTING IS COMPLETE

Vendors should complete the Integration Testing Checklist throughout the course of testing. Once testing has been completed, please email the completed testing checklist to CareBridge for validation <a href="mailto:evvintegration@carebridgehealth.com">evvintegration@carebridgehealth.com</a>. CareBridge will verify that all test cases were successfully passed and provide confirmation that the vendor is able to begin submitting production data. If any test cases had to be omitted due to vendor capabilities, they should provide a rationale for why that test case cannot be complete and (if necessary) a mitigation plan for provider agencies to ensure claims will not be impacted.
